Lab Activity 2 and 3 Final Submission

Student file: Acuesta_John_Constantine_LabActivity2_and_3.pdf
Theme: Petal Express (Laravel 11 + Blade + Breeze, SQLite).

Part A (Lab Act 2): roles, showcase_flowers, admin save, member read/static form.
Part B (Lab Act 3): PostRequest, flash toast, categories, pagination, trash.

Screenshots include middleware 403 checks, admin CRUD, validation,
public showcase filters and pages, and soft-delete trash.

Demo logins used in screenshots:
admin@test.com / 123 · test@test.com / 123

Lab Act 2 starts in SQLite. I added role on users and the showcase_flowers table with user_id and softDeletes().

Terminal – Lab Act 2 migrations and seed

```
$ cd petal-express
$ php artisan migrate
2026_09_23_234450_add_role_to_users_table ..... DONE
2026_09_23_234450_create_showcase_flowers_table ..... DONE
  user_id foreignId, softDeletes() on showcase_flowers
$ php artisan db:seed
DatabaseSeeder: admin@test.com + test@test.com + starter bouquets

SQLite: petal-express/database/database.sqlite
```

Admin and member post routes sit behind auth and the role middleware. Wrong role stops at 403 before the controller runs.

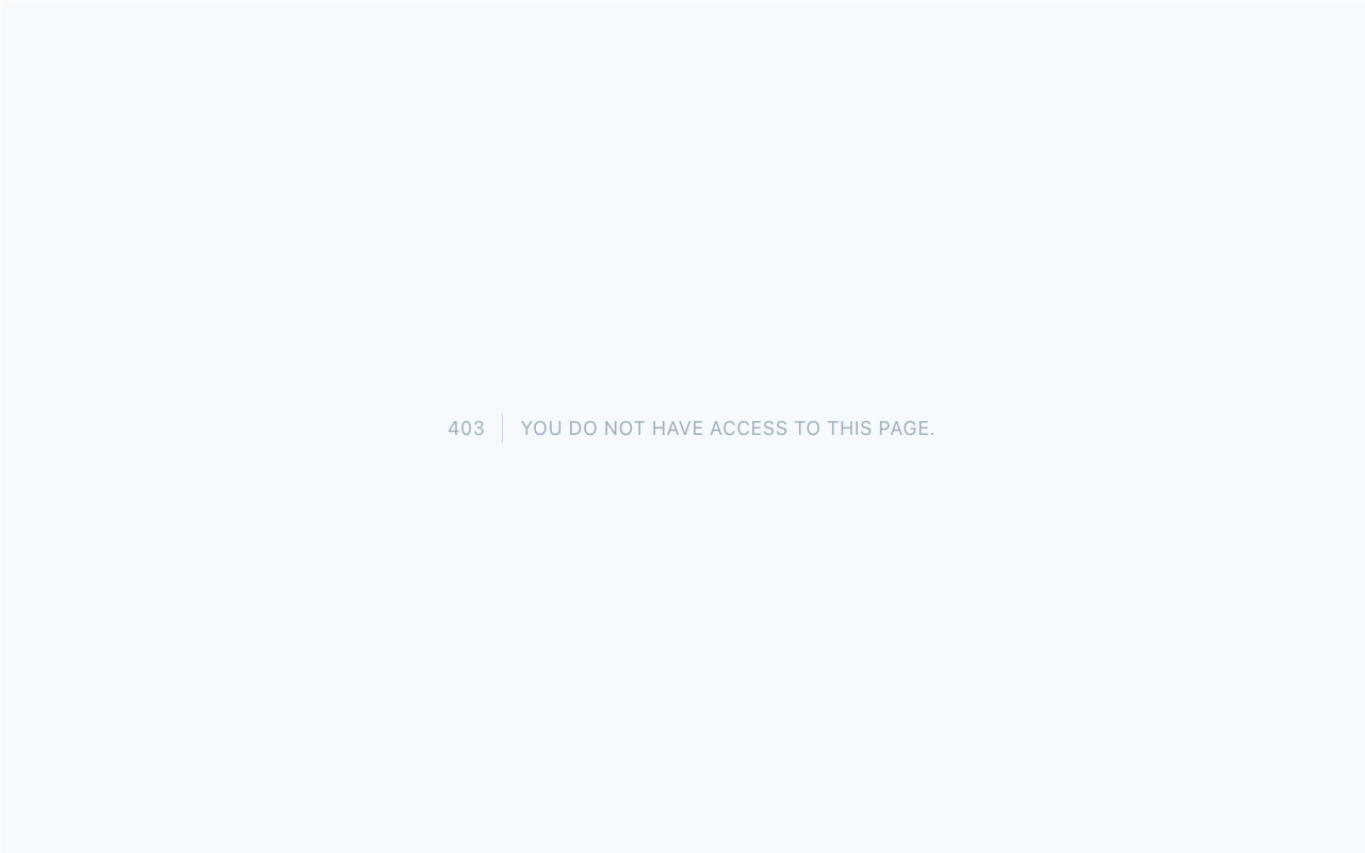

Terminal — Lab Act 2 role routes

```
$ php artisan route:list --path=admin
GET|HEAD  admin/posts ........ admin.posts.index › AdminPostController@index
  POST      admin/posts ........ admin.posts.store › AdminPostController@store
  GET|HEAD  admin/posts/create admin.posts.create › AdminPostController@create
  GET|HEAD  admin/posts/trash .. admin.posts.trash › AdminPostController@trash
  PUT       admin/posts/{post} admin.posts.update › AdminPostController@update
  DELETE    admin/posts/{post} admin.posts.destroy › AdminPostController@dest…
  GET|HEAD  admin/posts/{post}/edit admin.posts.edit › AdminPostController@ed…
  DELETE    admin/posts/{post}/force admin.posts.force › AdminPostController@…
  PATCH     admin/posts/{post}/restore admin.posts.restore › AdminPostControl…

                                                    Showing [9] routes
GET|HEAD  admin/posts ........ admin.posts.index › AdminPostController@index
  POST      admin/posts ........ admin.posts.store › AdminPostController@store
  GET|HEAD  admin/posts/create admin.posts.create › AdminPostController@create

Middleware: auth + role:admin | role:user
app/Http/Middleware/EnsureUserHasRole.php
bootstrap/app.php registers alias role
```

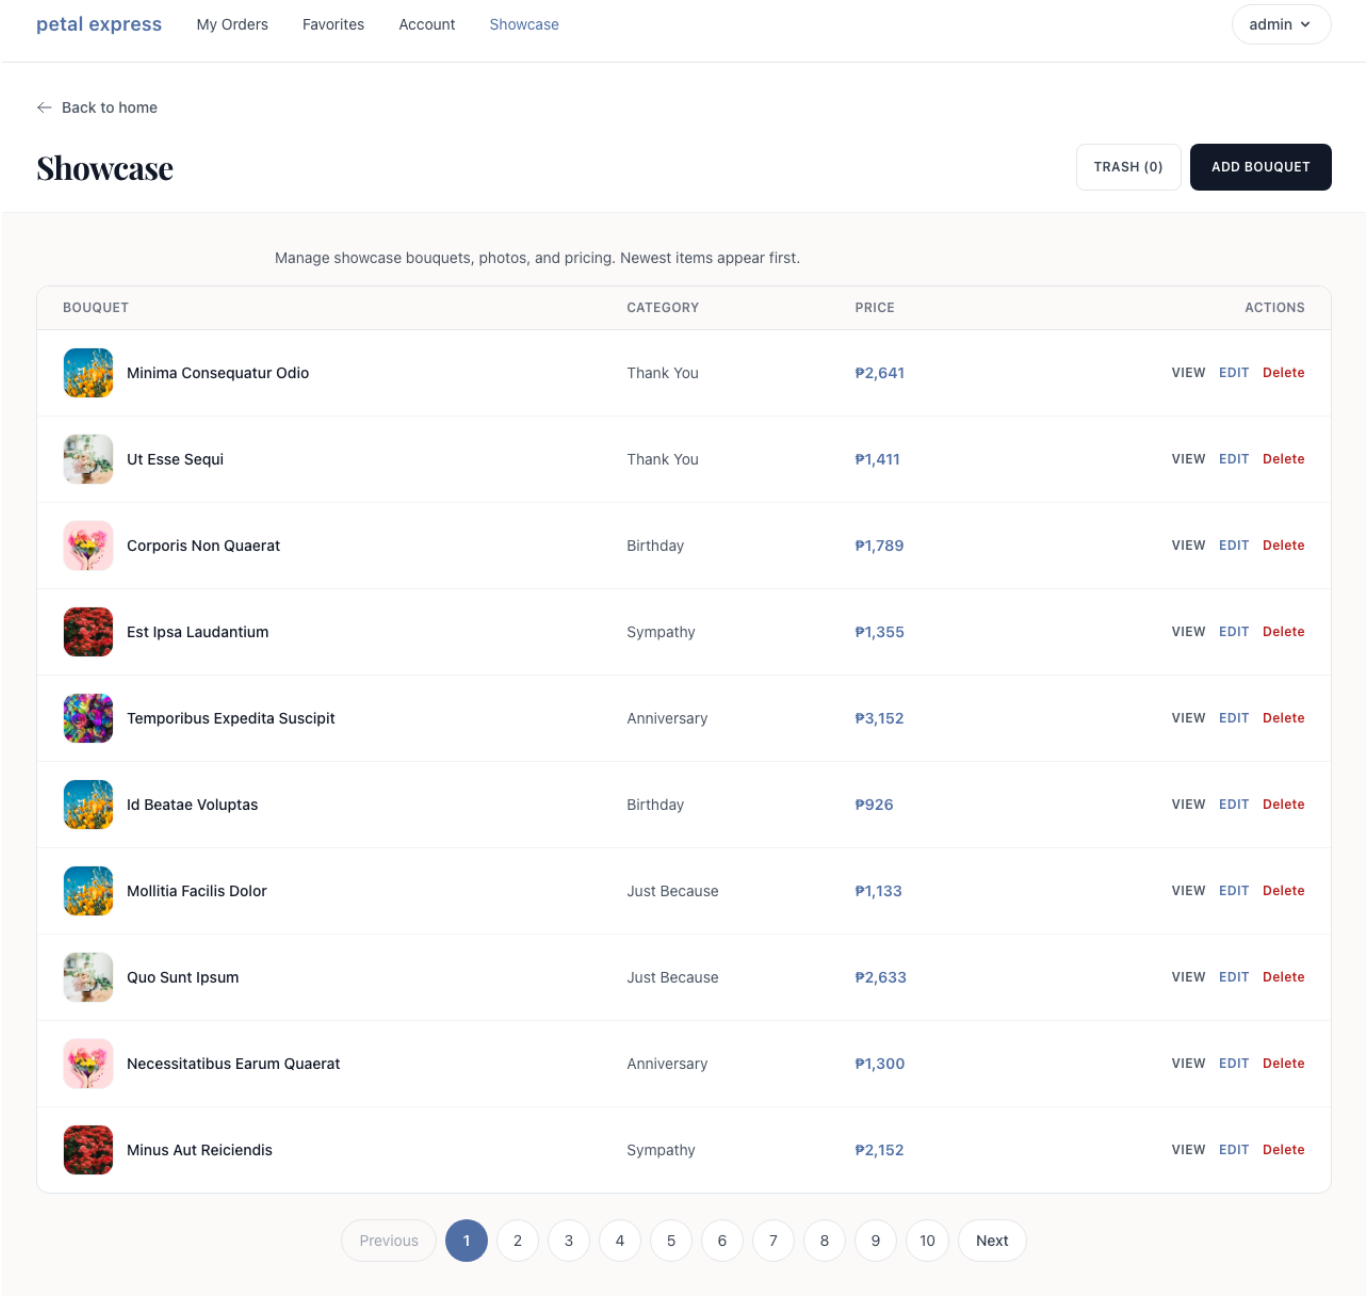

Logged in as test@test.com (role user). /admin/posts is blocked with 403.

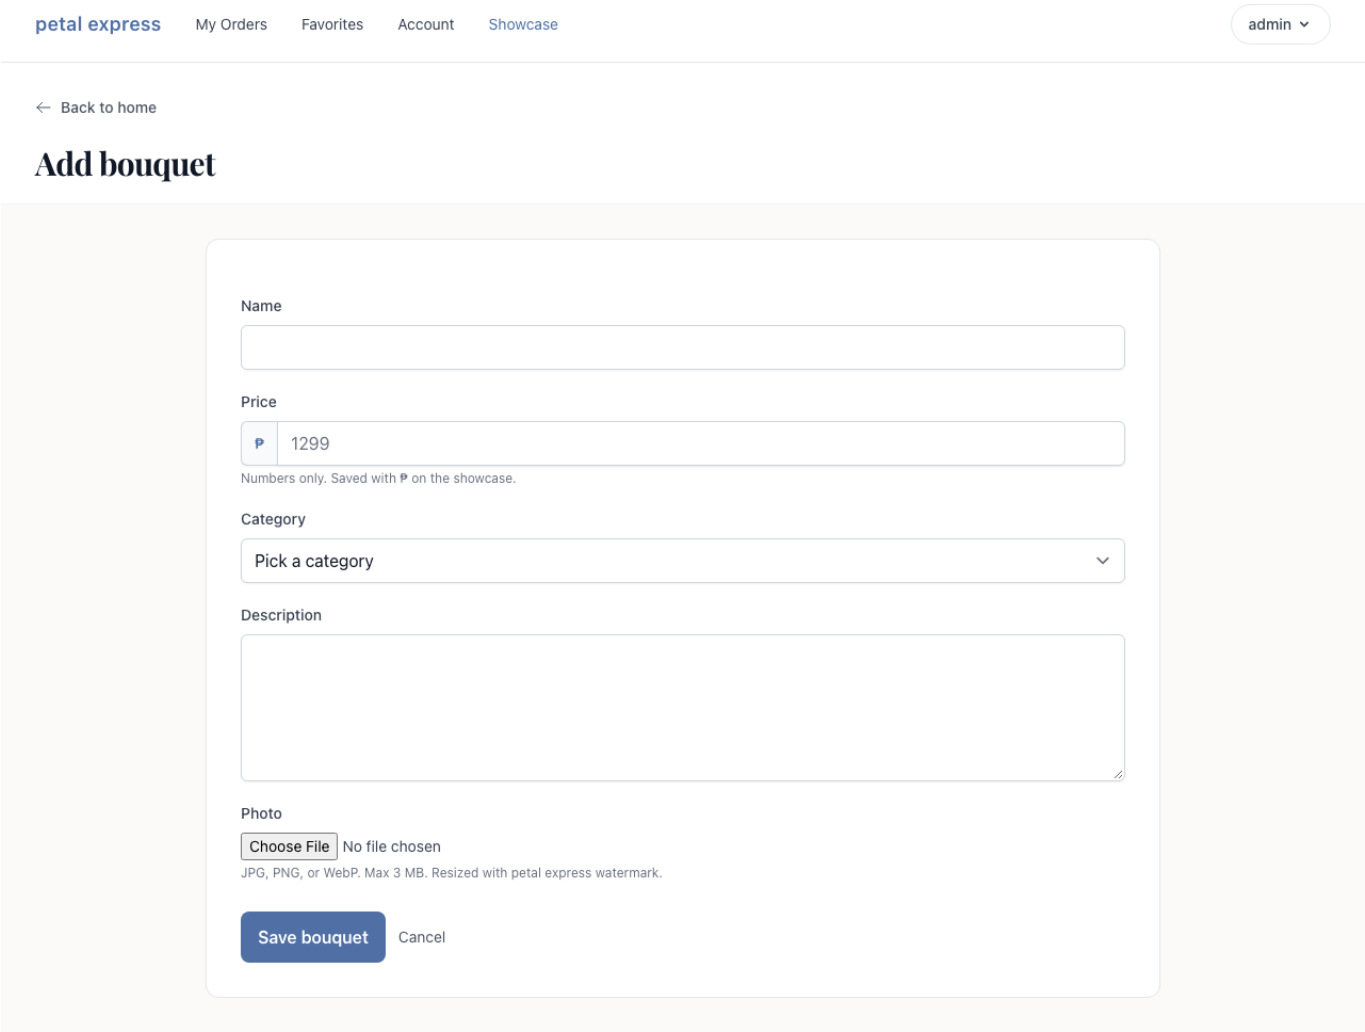

Logged in as admin@test.com. The member custom-order page is blocked the same way.

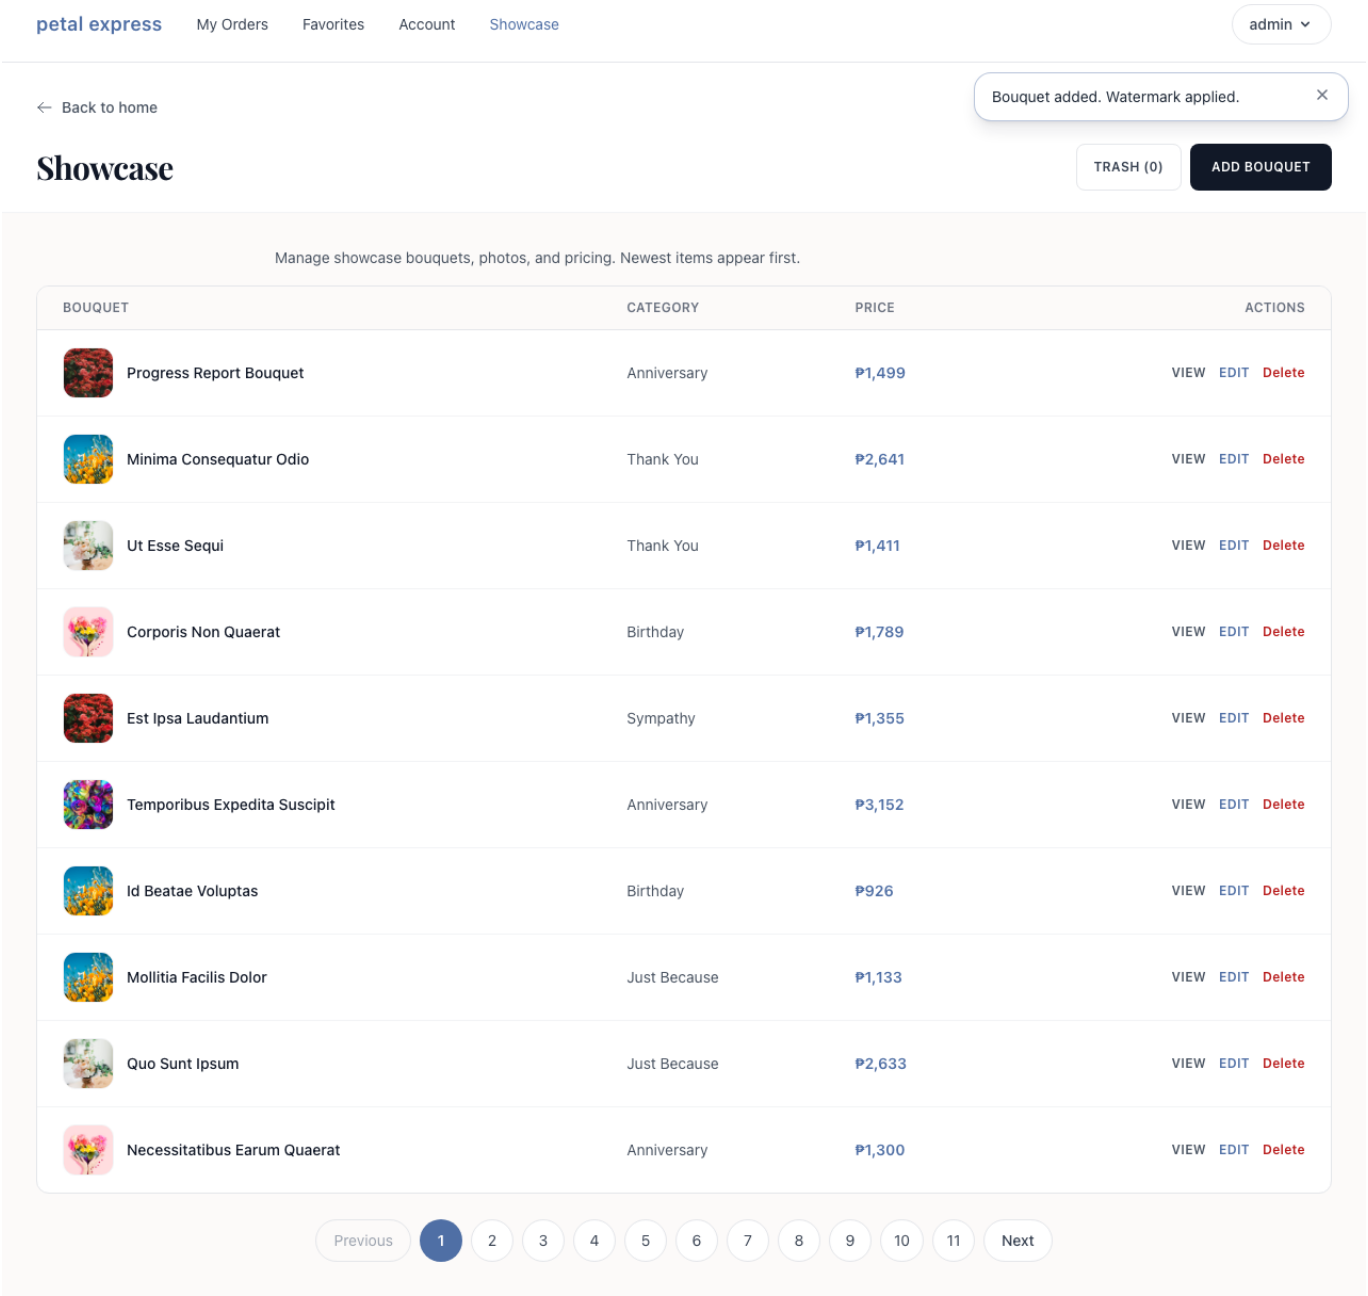

Admin showcase list. Eloquent reads showcase_flowers through the Post model.

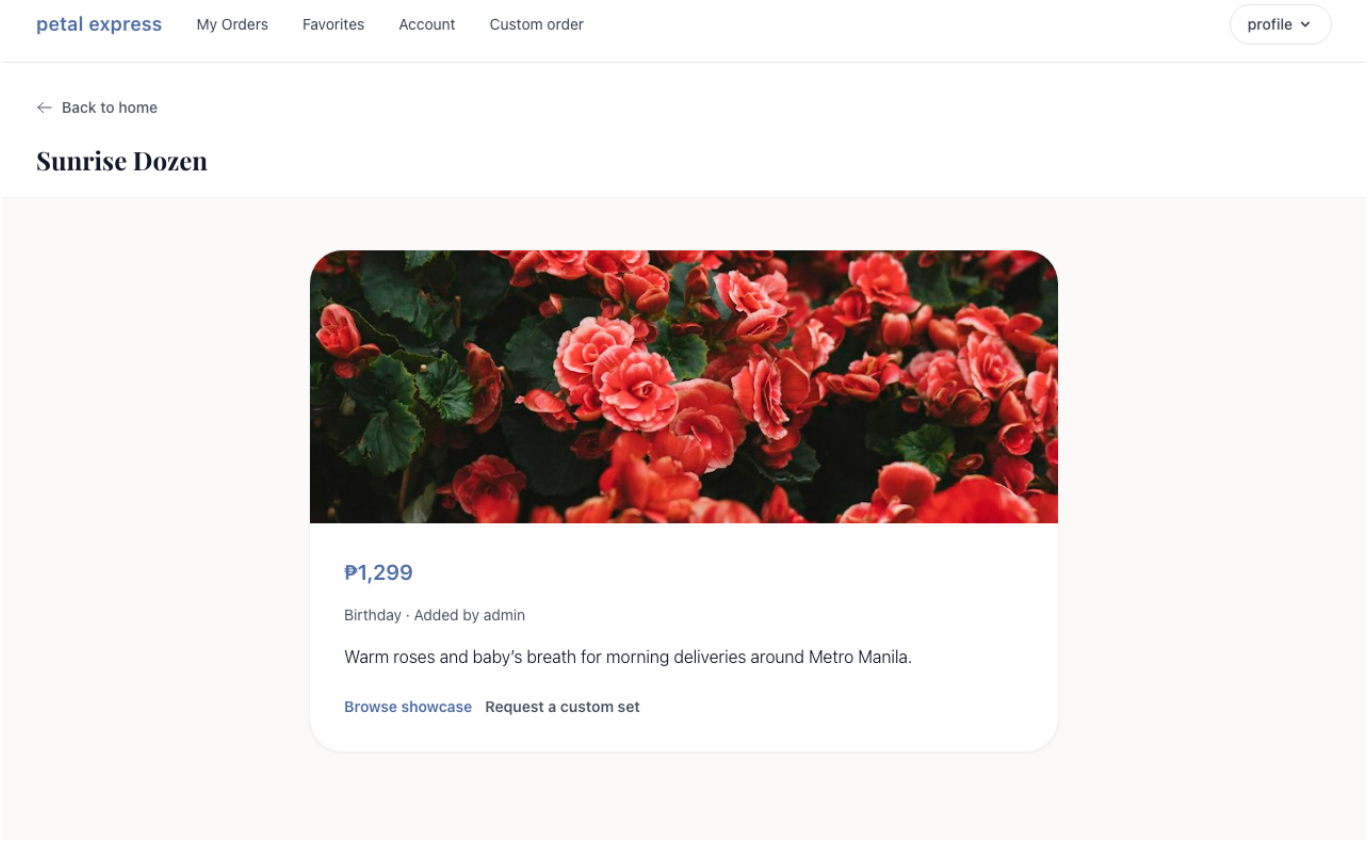

Add bouquet form. POST uses @csrf; user_id will come from auth()->id() on save.

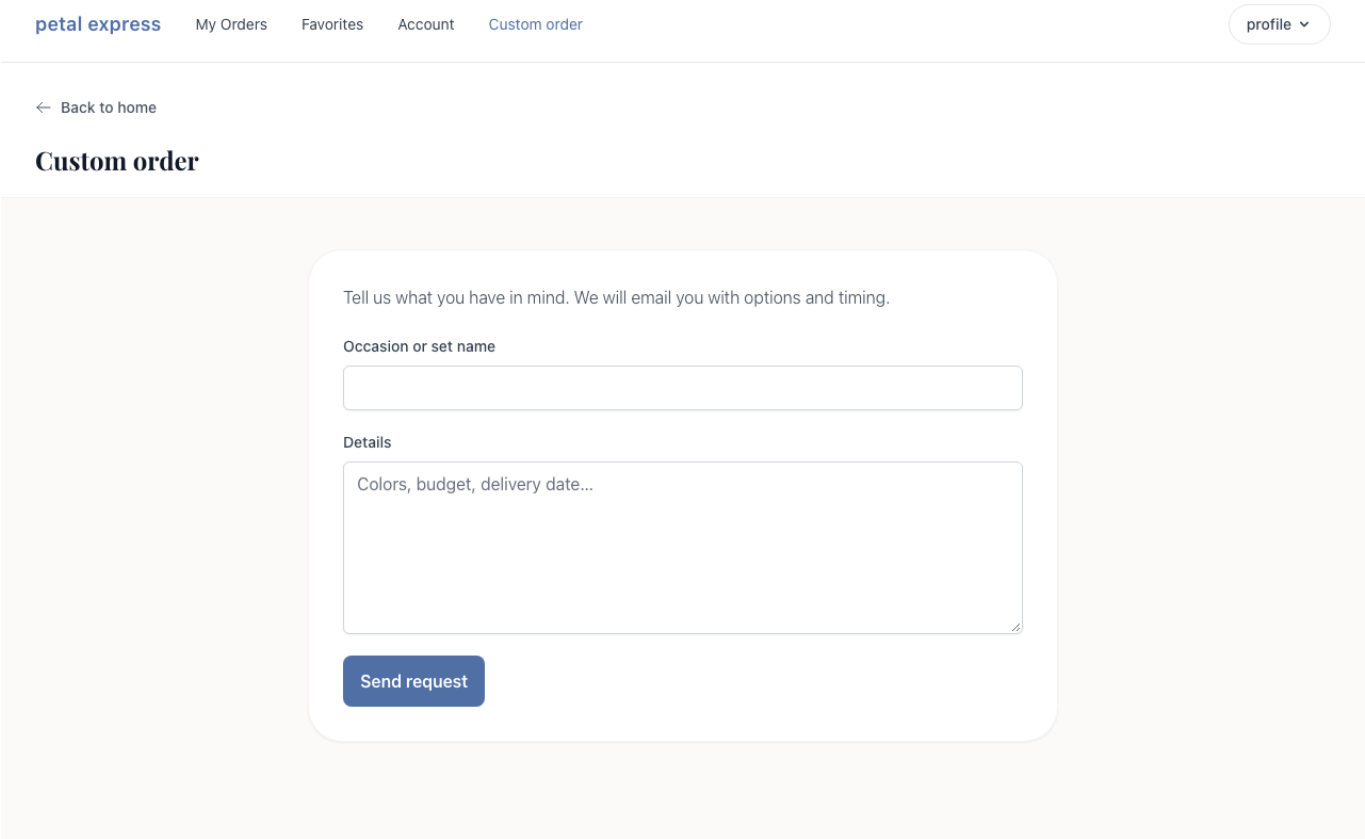

Valid save redirects back with a success flash. The toast reads session data once.

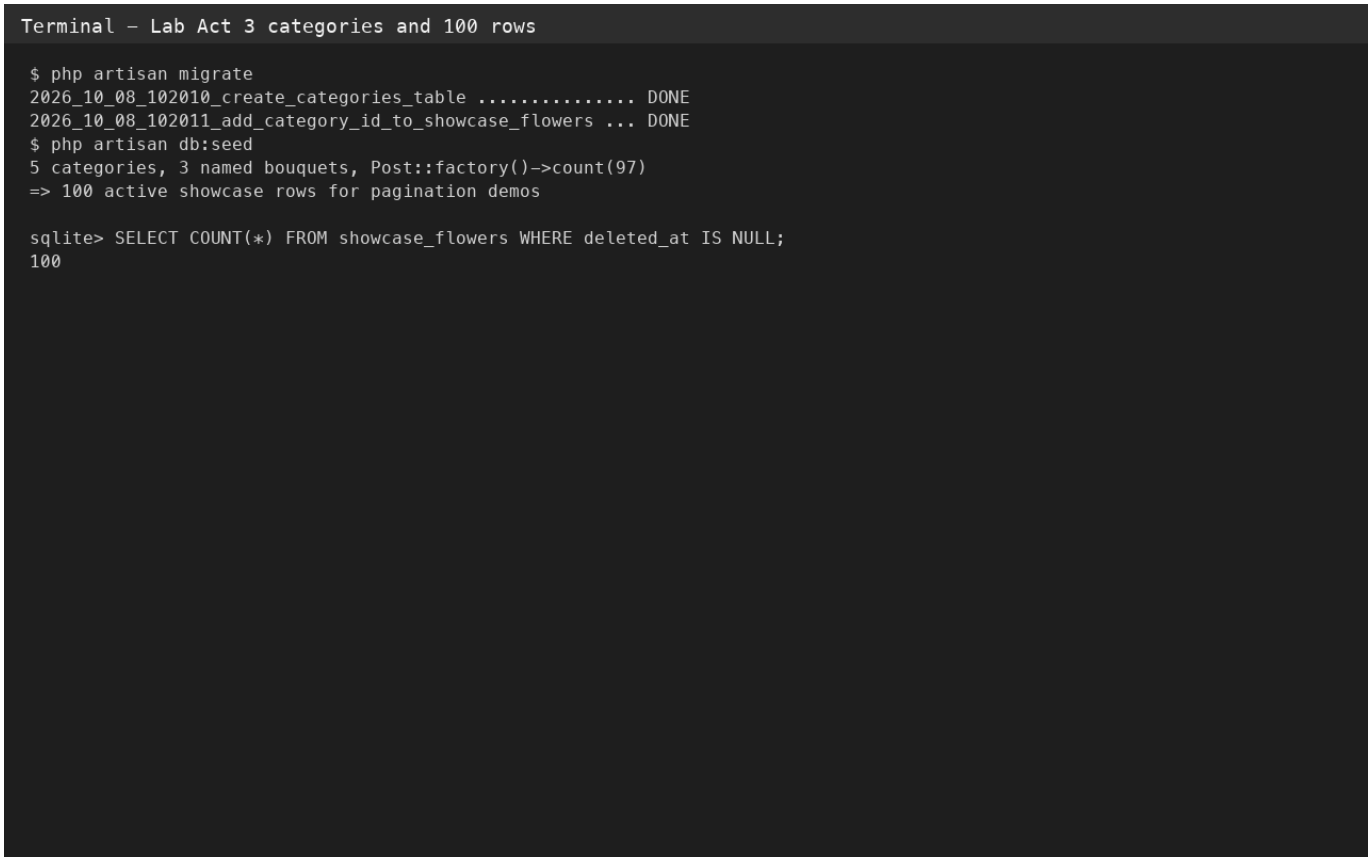

Member bouquet page. Route model binding turns {post} into a Post row.

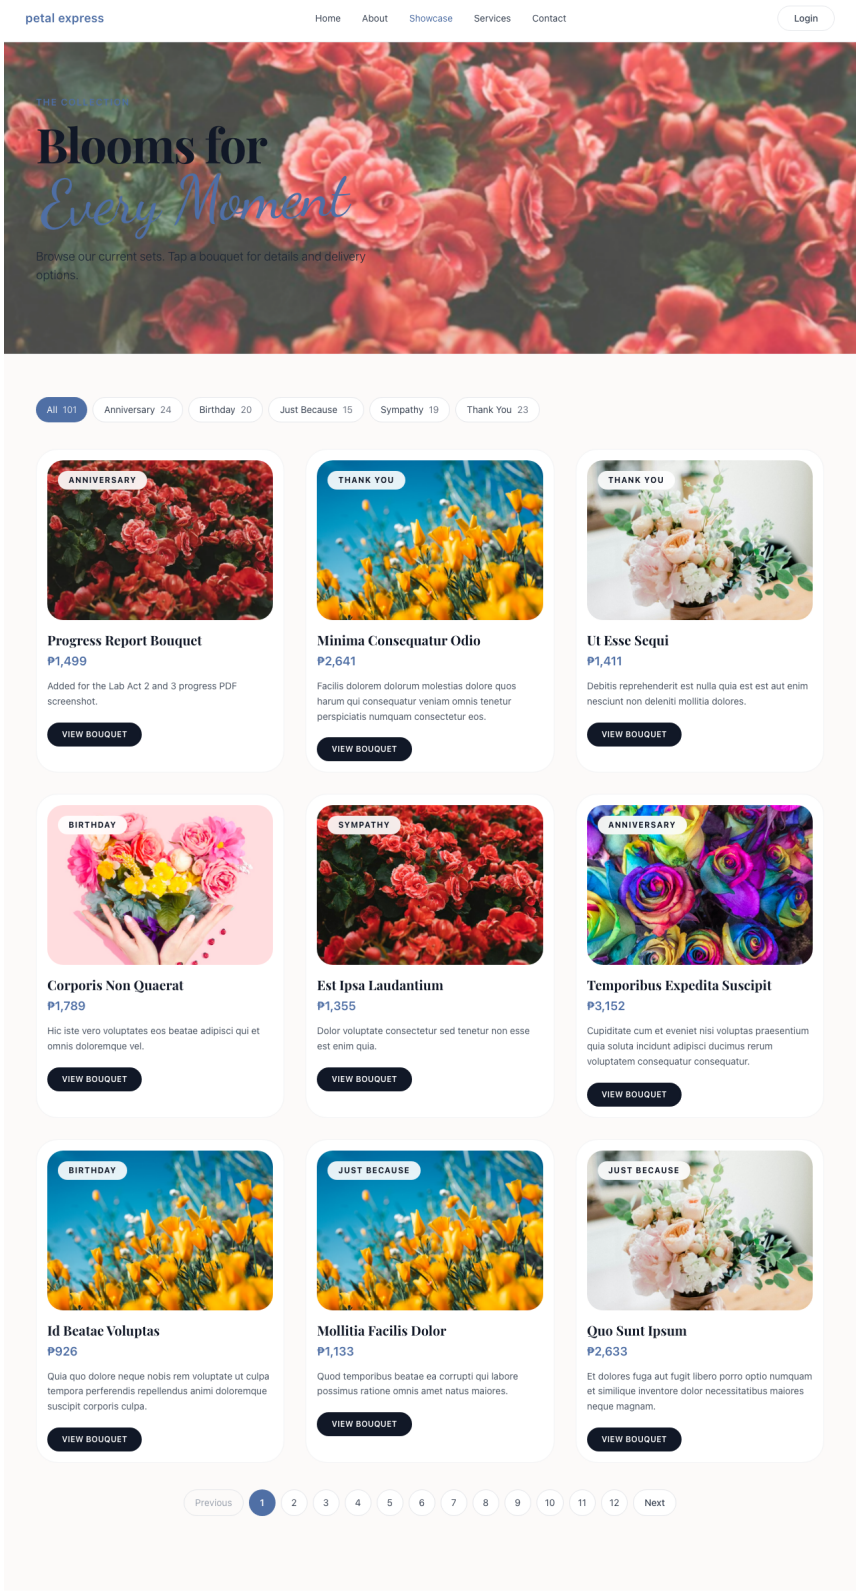

Custom order validates and flashes thank-you. It does not call Post::create.

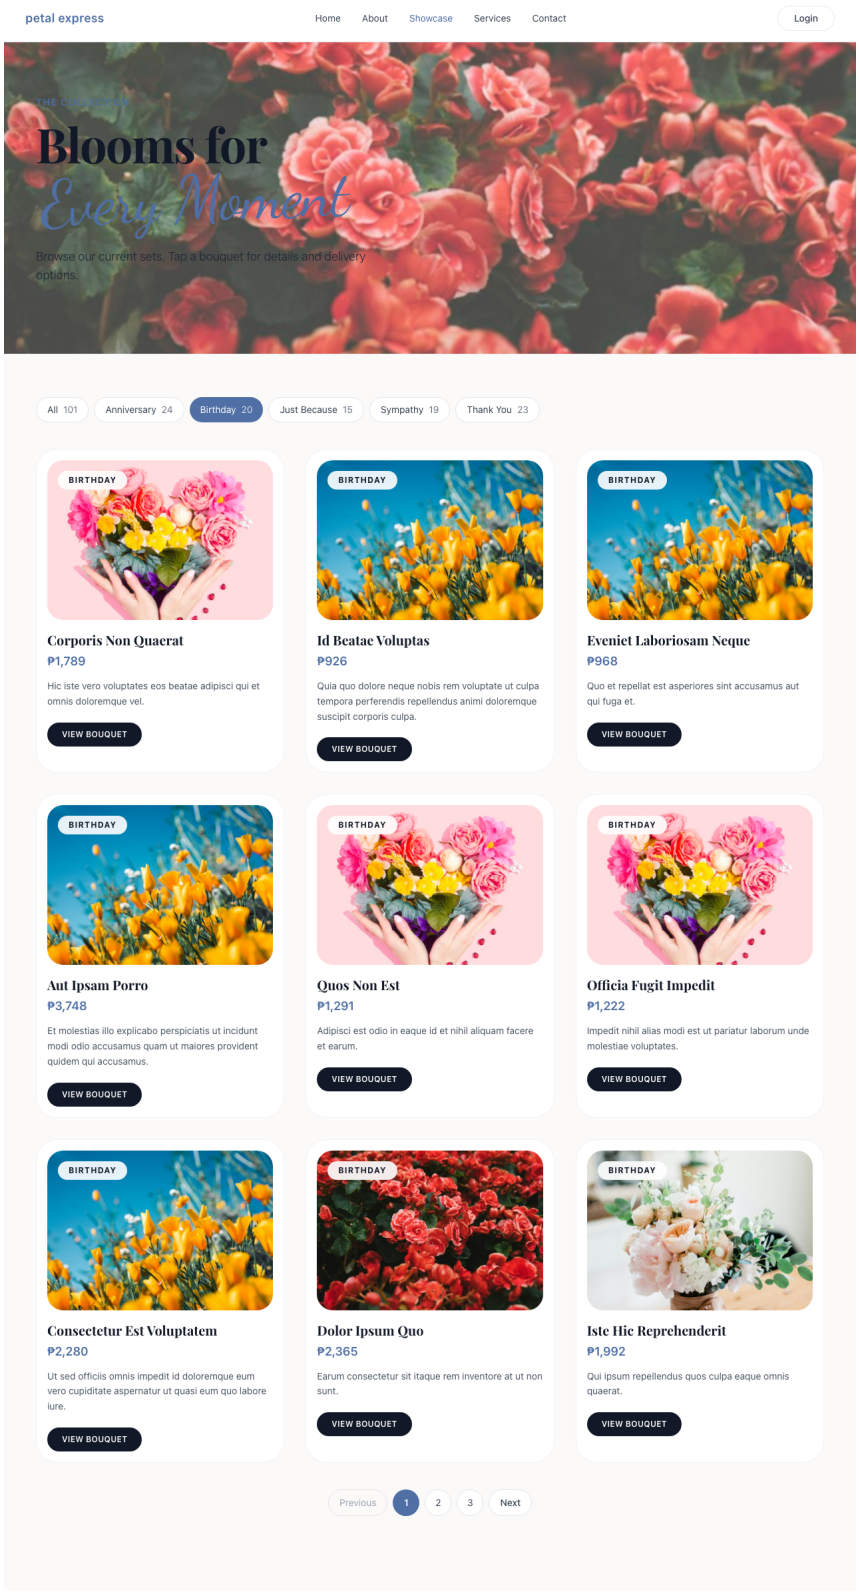

Lab Act 3 adds categories and reseeds to 100 bouquets so pagination is easy to show.

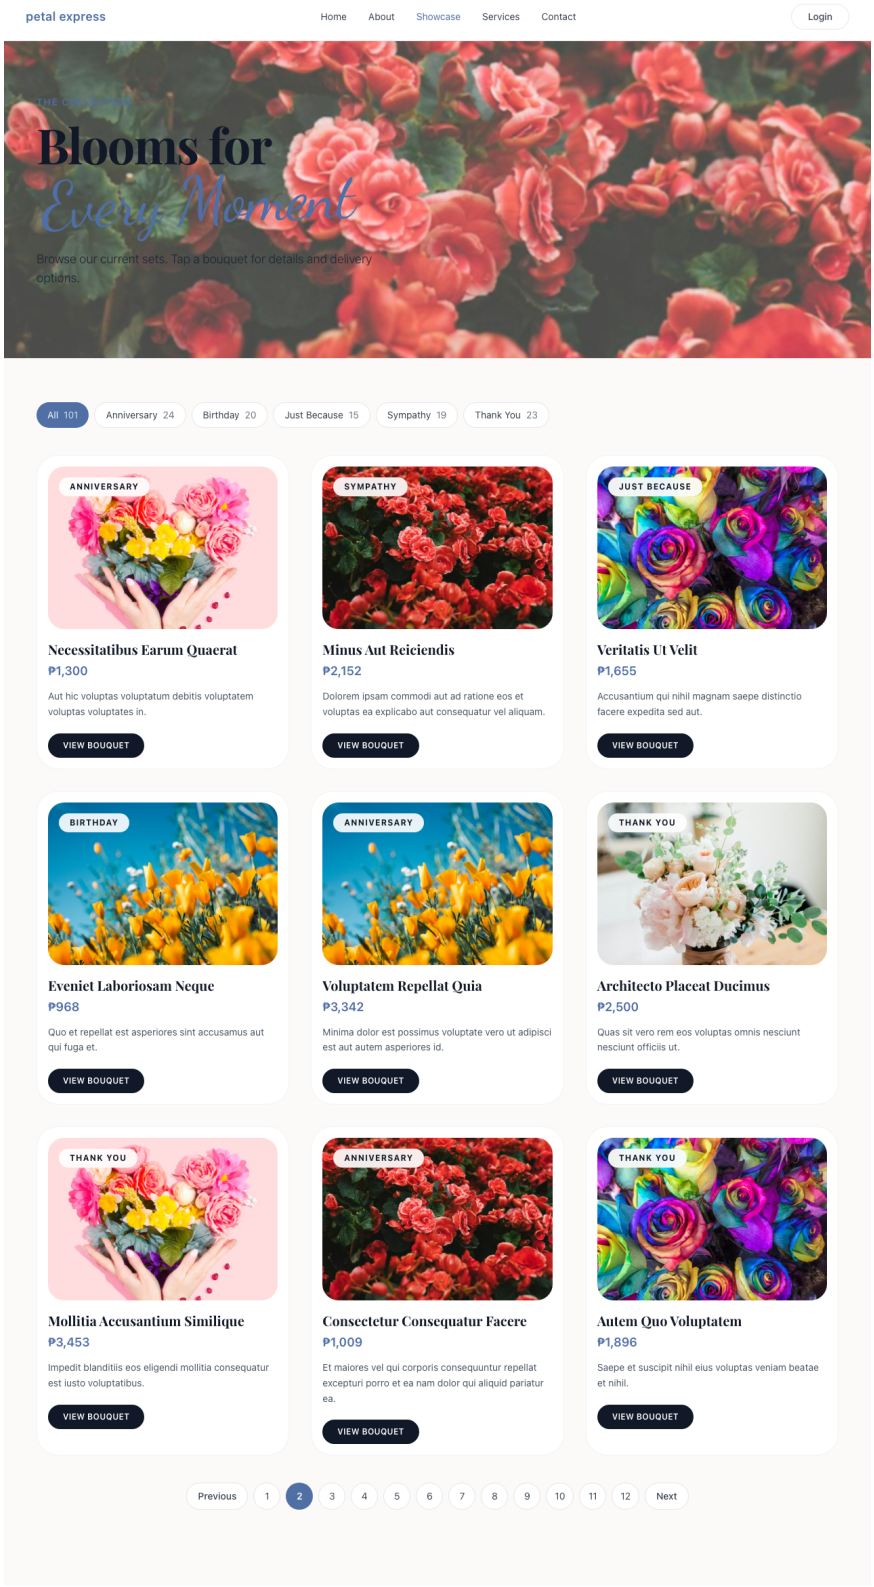

Public showcase category chips use withCount and ?category= in the URL.

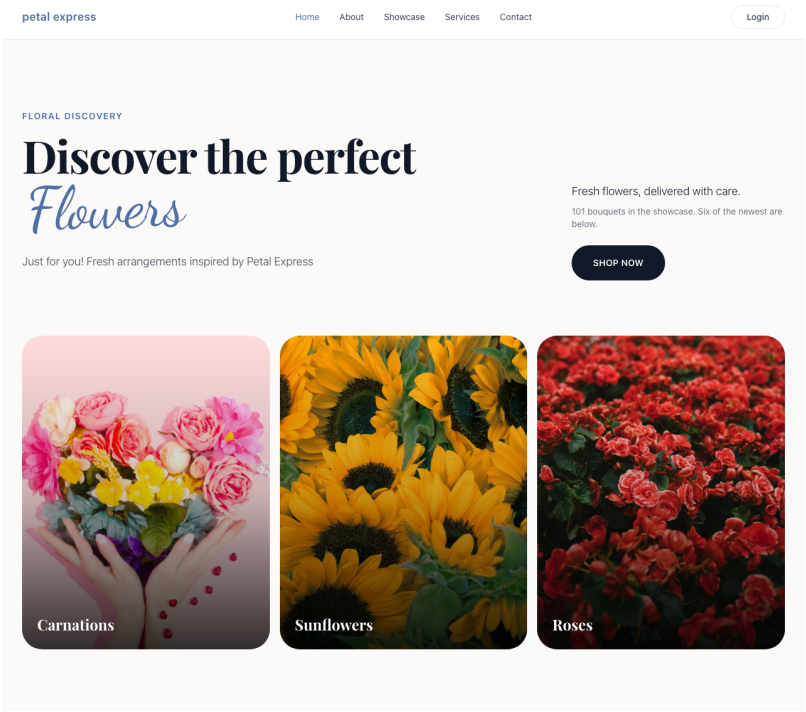

Filtered showcase keeps the chip active and still paginates with withQueryString().

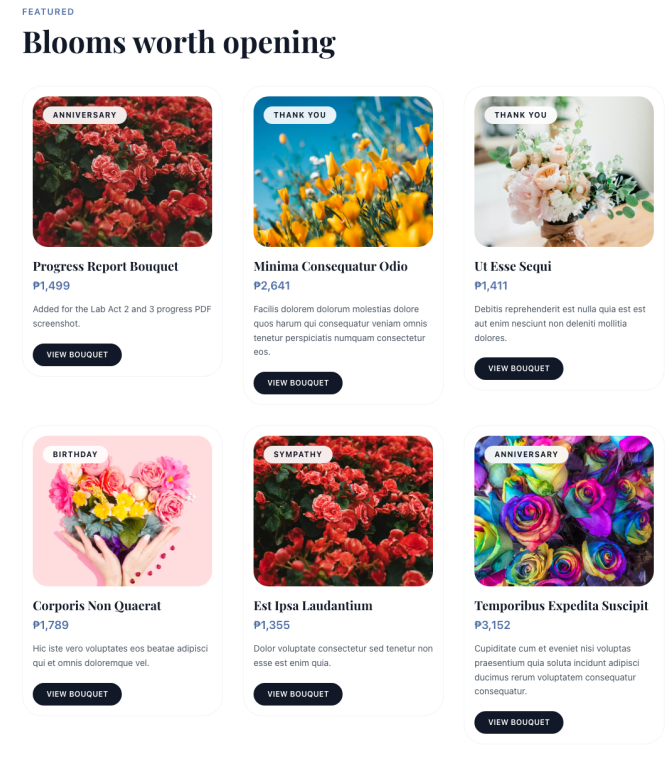

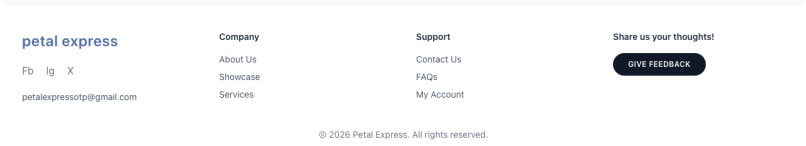

Showcase uses paginate(9). Page links only load nine cards at a time.

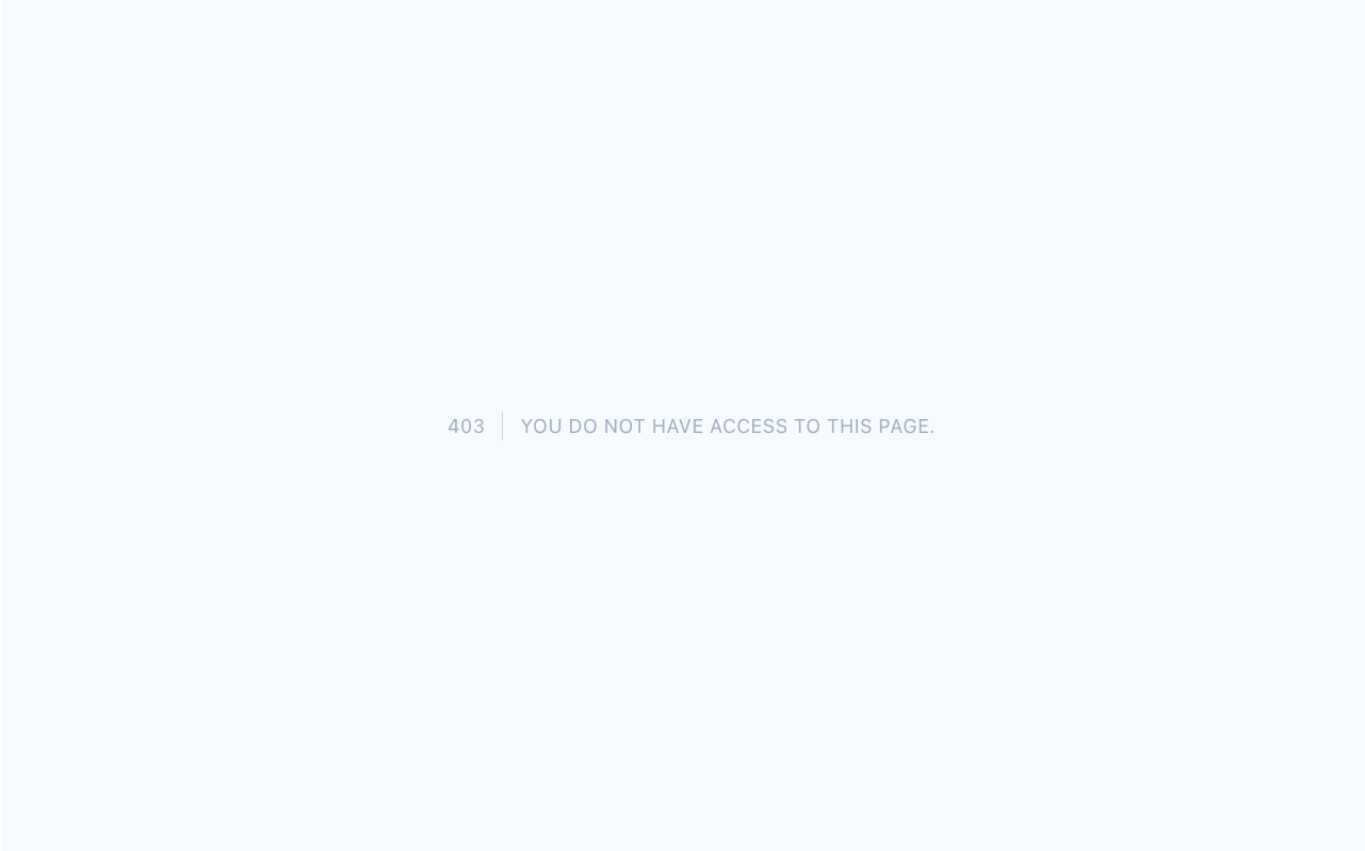

Home shows latest()->take(6) while the headline count uses Post::count().

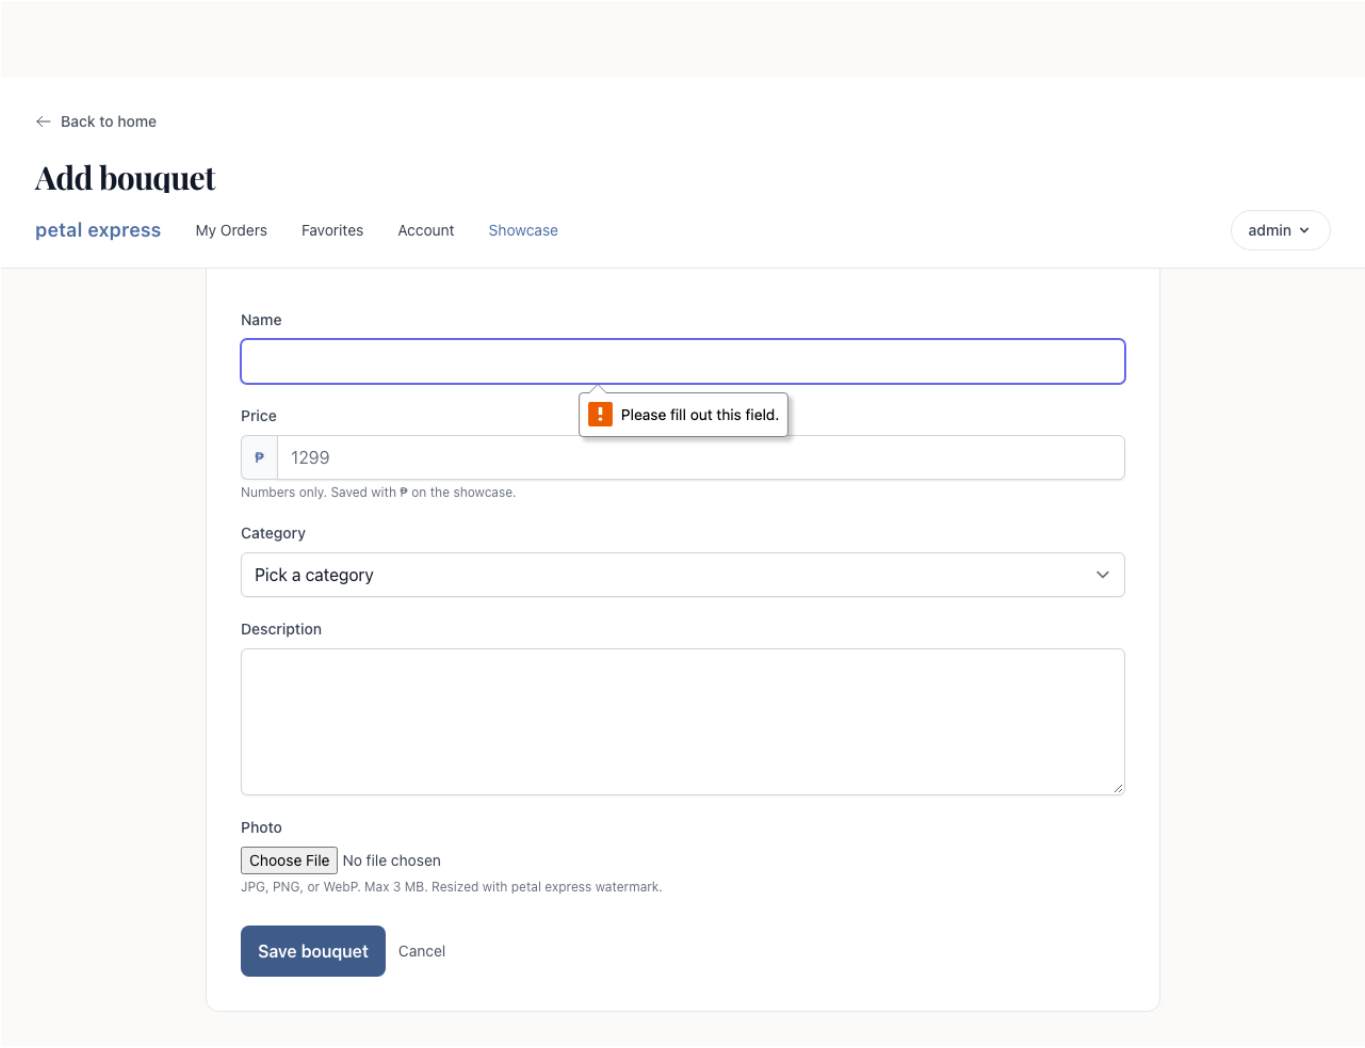

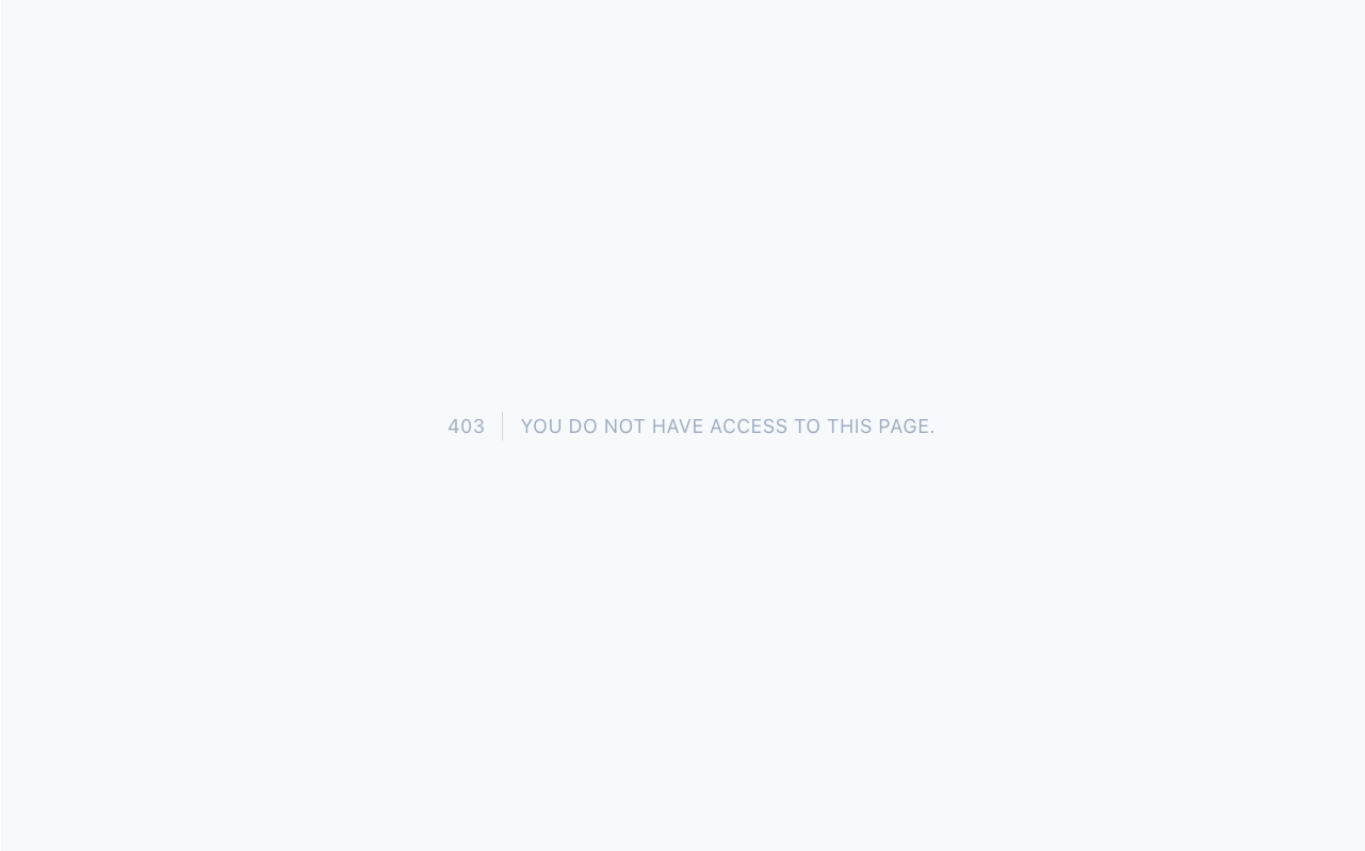

Admin list uses paginate(10) with the same Tailwind pagination view.

Empty submit hits PostRequest rules. Errors show under fields and once in the toast.

Trash lists onlyTrashed() rows. Restore and delete forever use withTrashed() routes.

Final checklist of Lab Act 2 and Lab Act 3 rubric pieces in this build.

Final checklist — Lab Act 2 and 3

```
Petal Express Lab Activity 2 and 3 — final submit

Lab Act 2:
- users.role + EnsureUserHasRole middleware (403)
- showcase_flowers table, Post model, admin CRUD save
- member show + static custom-order form (no insert)

Lab Act 3:
- PostRequest validation + flash toast component
- categories belongsTo / hasMany + filter chips
- paginate on showcase, admin list, and trash
- soft delete, restore, force delete
