Lab Activity 1 Final Submission

Student file: Acuesta_John_Constantine_LabActivity1.pdf
Theme: Petal Express (Laravel + Blade + Breeze, no React).

This PDF shows the project from setup to final output.
Screenshots include project creation, Breeze install, routes and controllers, guest pages, route parameter, Blade component and slot, contact form with CSRF, Breeze layout customization, authenticated pages, middleware redirect, and final testing.

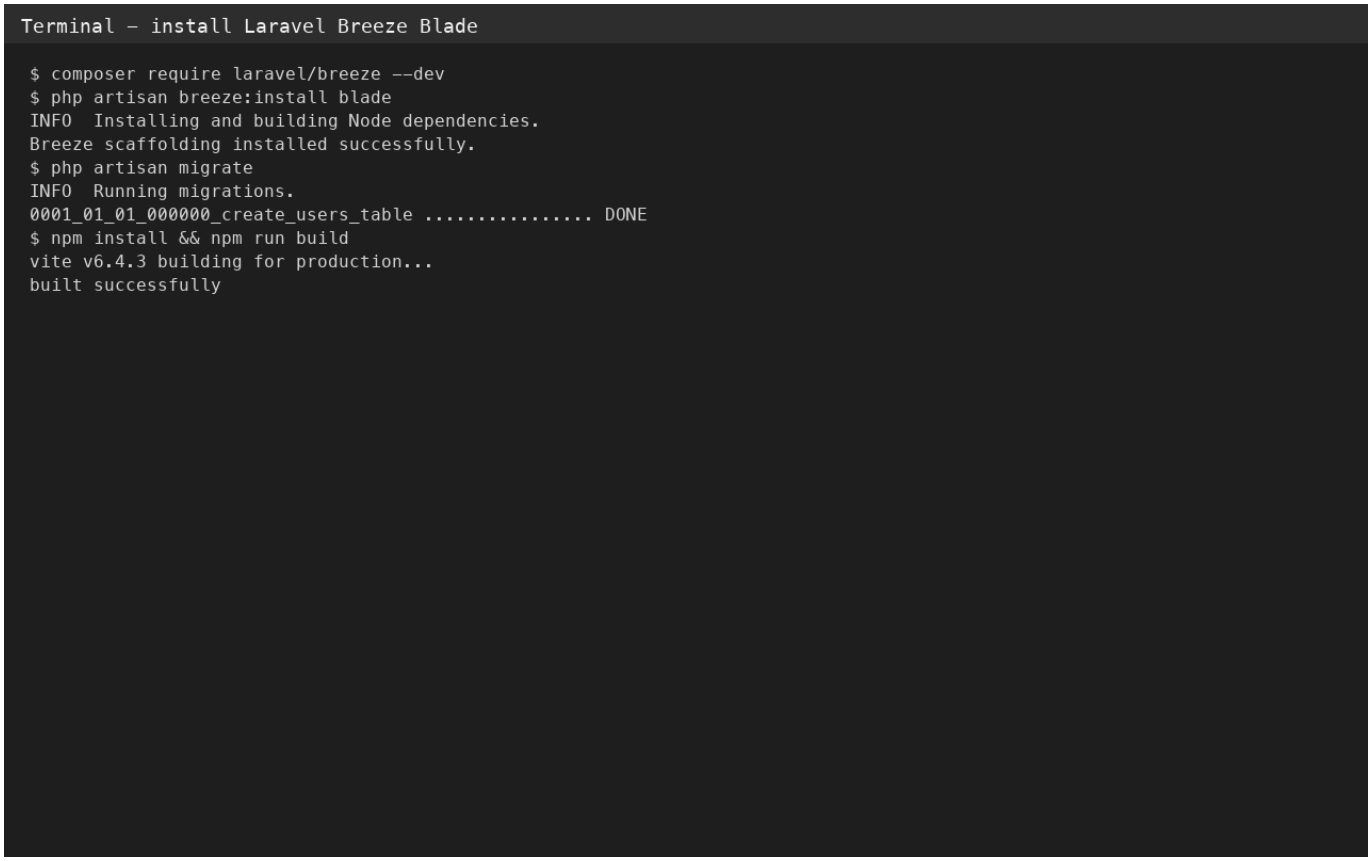

Demo login used in screenshots:
demo@petalexpress.test / password

Created the Laravel project with Composer so I had a clean Petal Express folder to start with.

Terminal — create Laravel 11 project

```
$ cd ~/laravel\ elec
$ composer create-project laravel/laravel:^11.0 petal-express
Creating a "laravel/laravel:^11.0" project at "./petal-express"
Installing laravel/laravel (v11.6.1)
...
$ cd petal-express
$ php artisan key:generate
Application key set successfully.
$ php artisan --version
Laravel Framework 11.56.1
```

Installed Laravel Breeze with Blade for register, login, logout, and the starter layouts.

Set up the routes and controllers. Each page has a named route and a controller method.

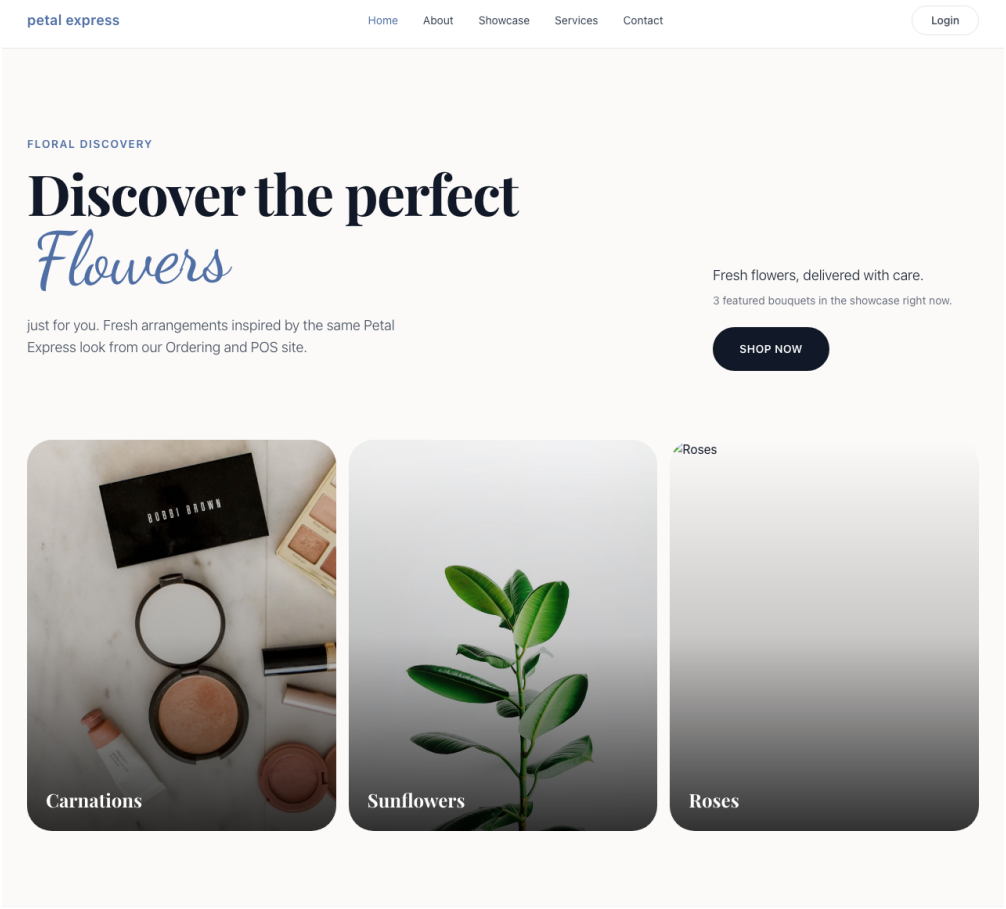

Terminal — routes and controllers

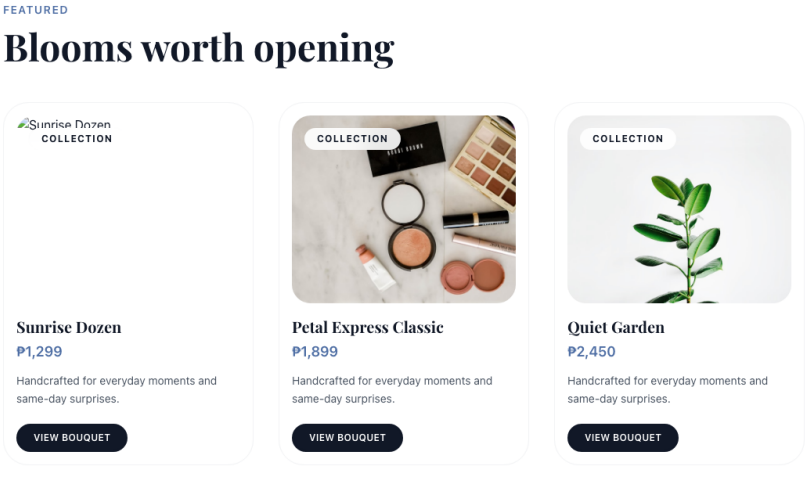

```
$ php artisan route:list
GET|HEAD   / ..................................... home › PageController@home
  GET|HEAD   bouquets/{id} ....... bouquets.show › PageController@bouquetsShow
  POST       email/verification-notification verification.send › Auth\EmailVe…
  GET|HEAD   reset-password/{token} password.reset › Auth\NewPasswordControll…
  GET|HEAD   storage/{path} ..................................... storage.local
  GET|HEAD   verify-email/{id}/{hash} verification.verify › Auth\VerifyEmailC…

                                                    Showing [6] routes

Controllers:
app/Http/Controllers/PageController.php
app/Http/Controllers/MemberController.php
app/Http/Controllers/ContactController.php
```

Home page. Guest layout, featured bouquets from PageController, and the site theme.

About page. Uses the same guest layout as the other public pages.

OUR STORY

Explore our *humble beginnings*

Petal Express started as a small flower desk for friends and classmates who needed same-day blooms without the mall chaos. We still keep things simple. Honest pricing, careful packing, and deliveries that show up when you need them.

Opened /bouquets/1. The id in the URL loads Sunrise Dozen from the controller.

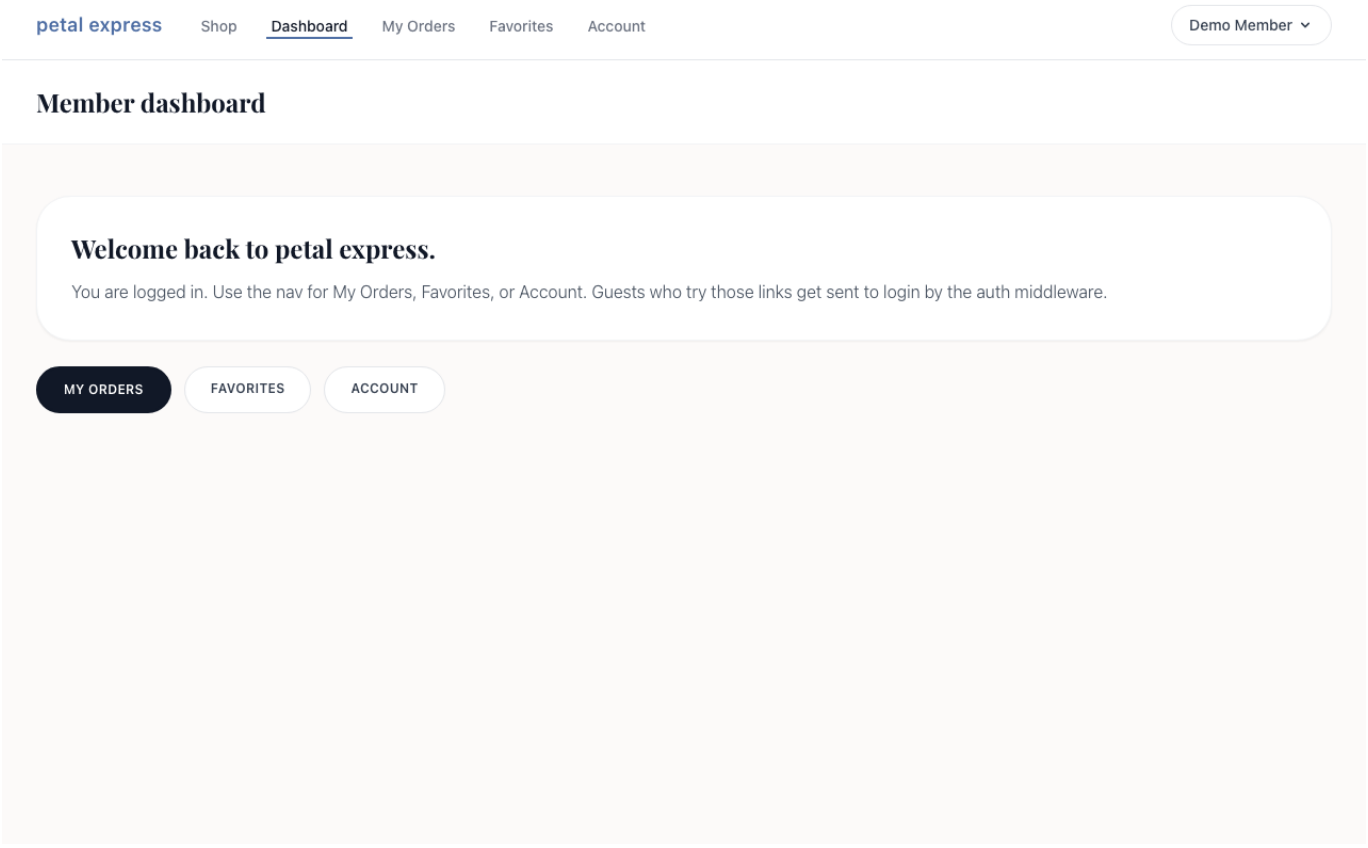

Contact form with @csrf so form posts are protected.

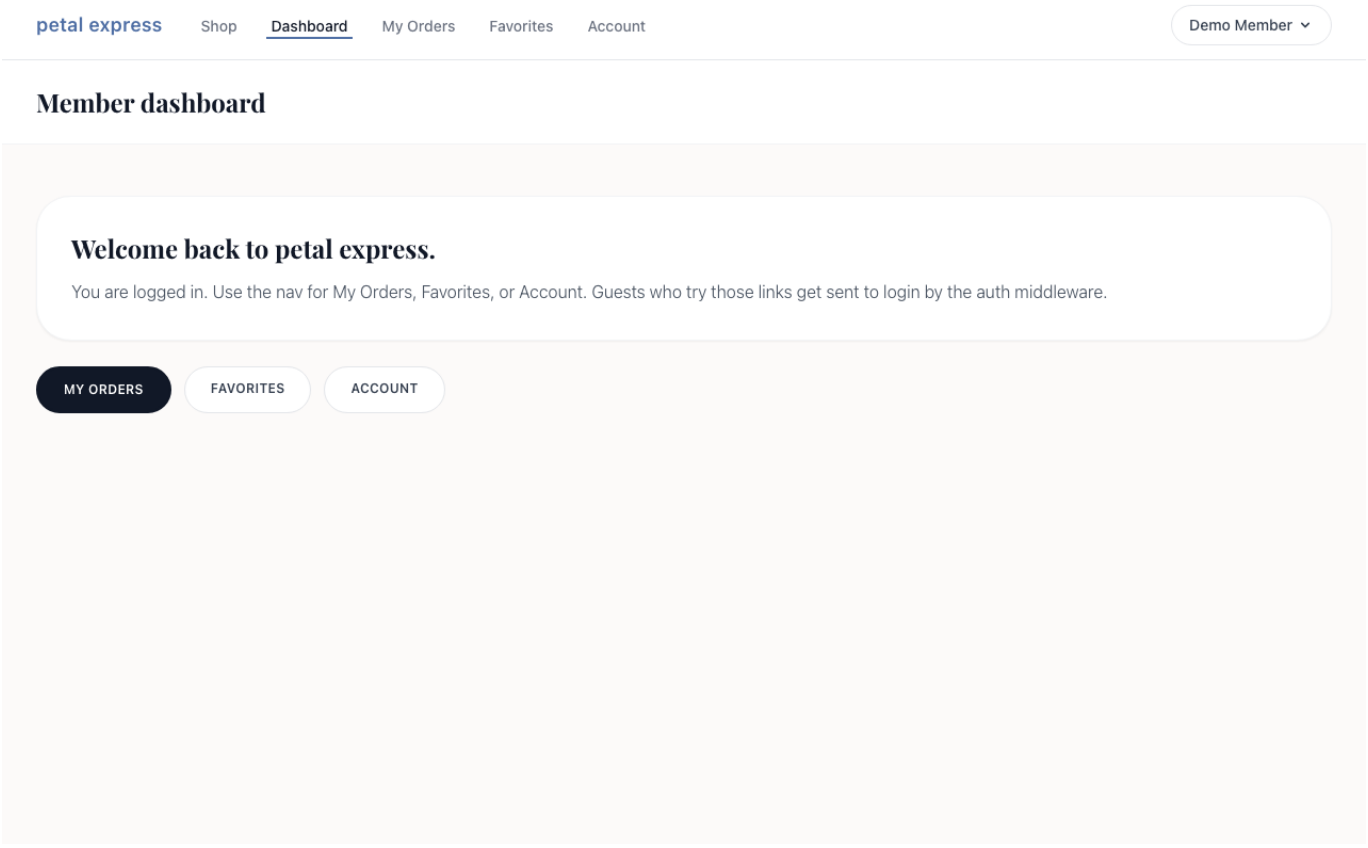

Breeze login page with Petal Express branding.

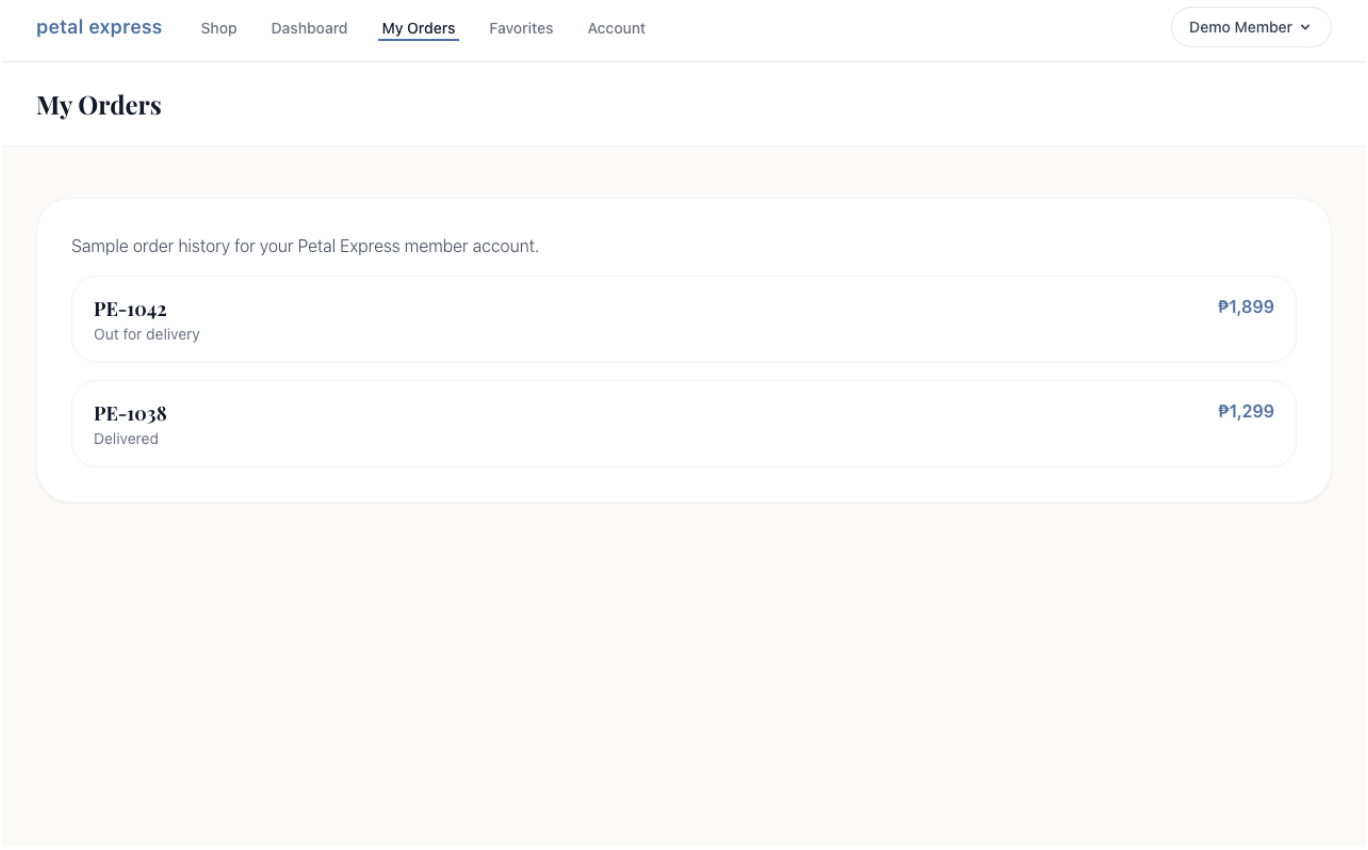

Dashboard after logging in with the demo member account.

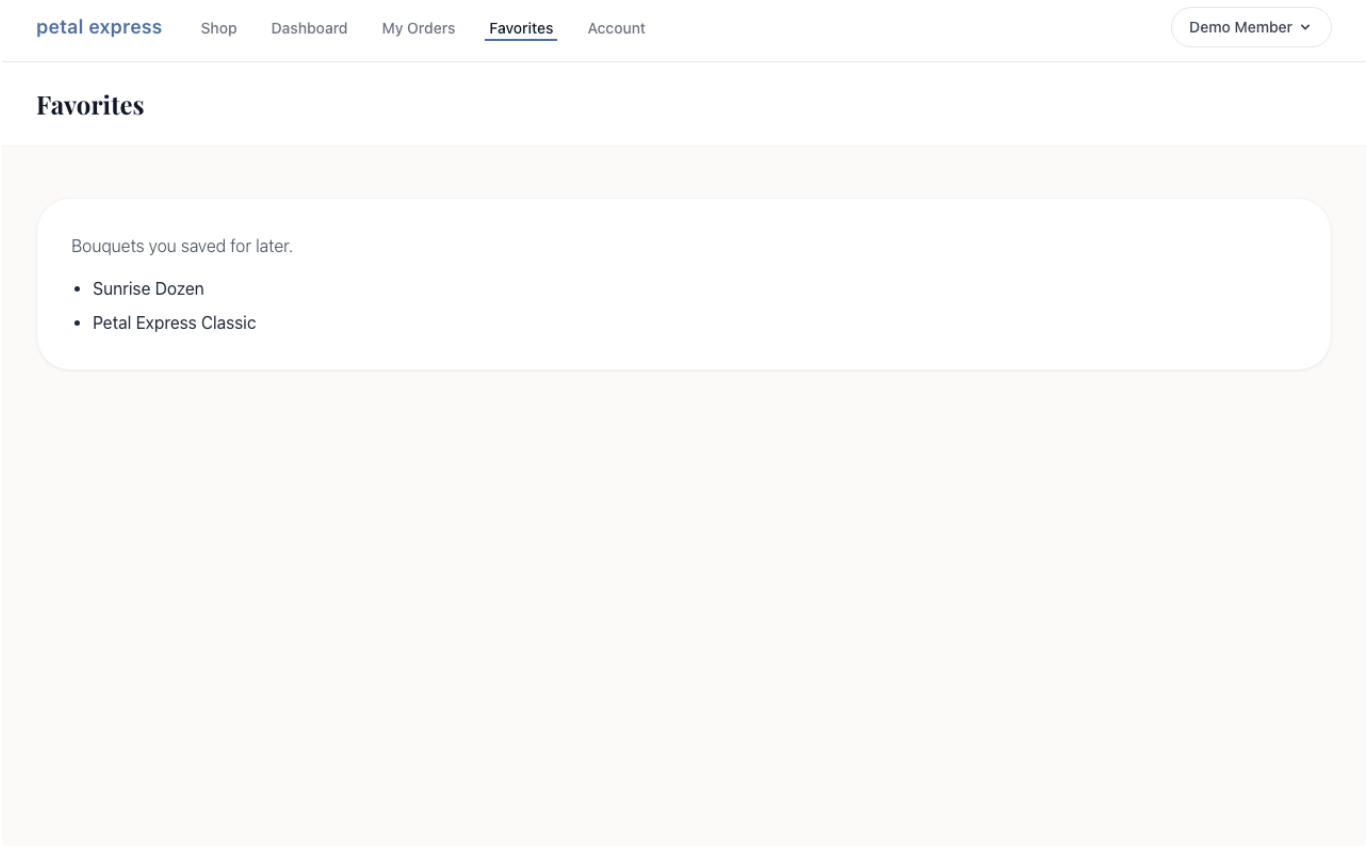

Breeze layout customization. Member nav has Shop, Dashboard, My Orders, Favorites, and Account.

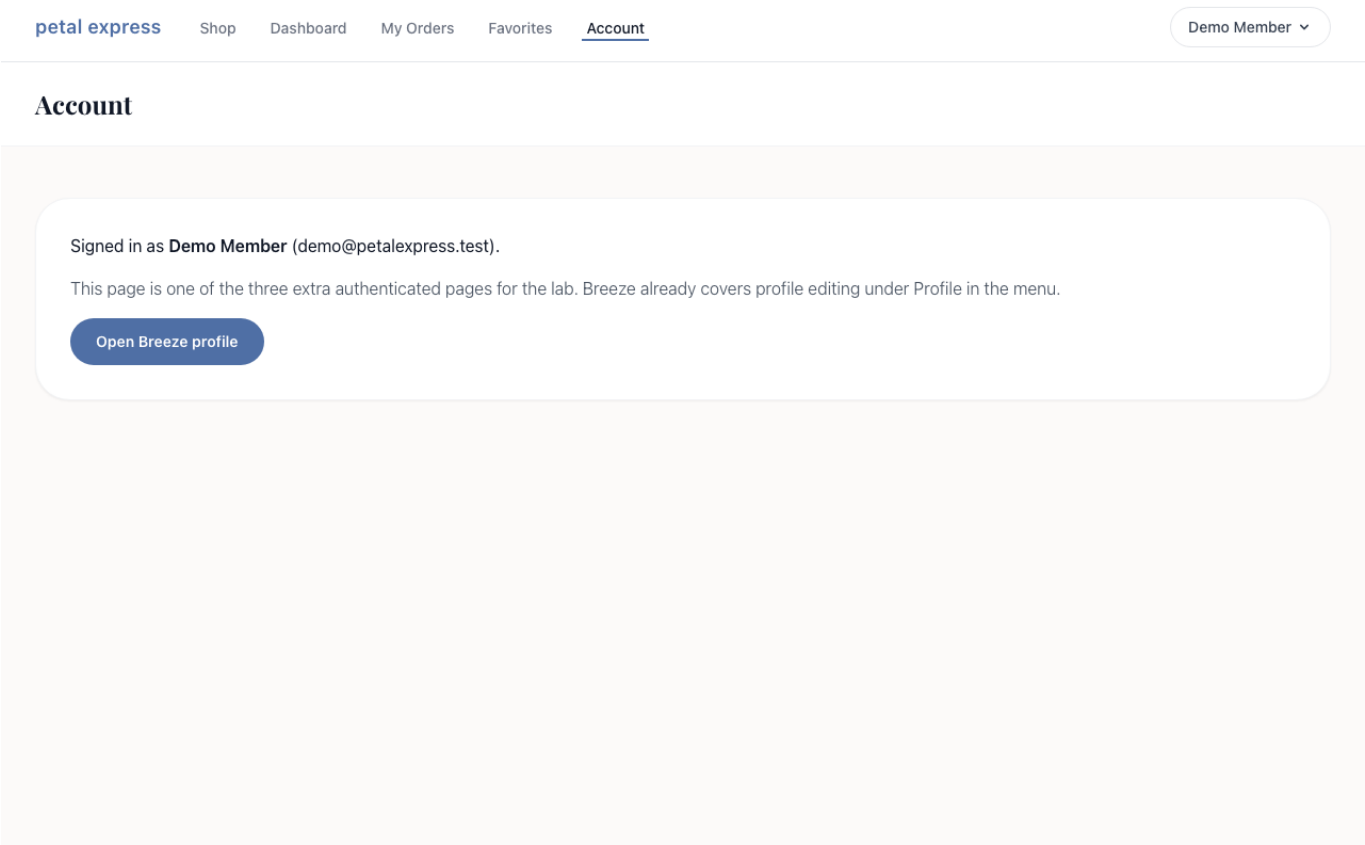

My Orders page. Only works when you are logged in.

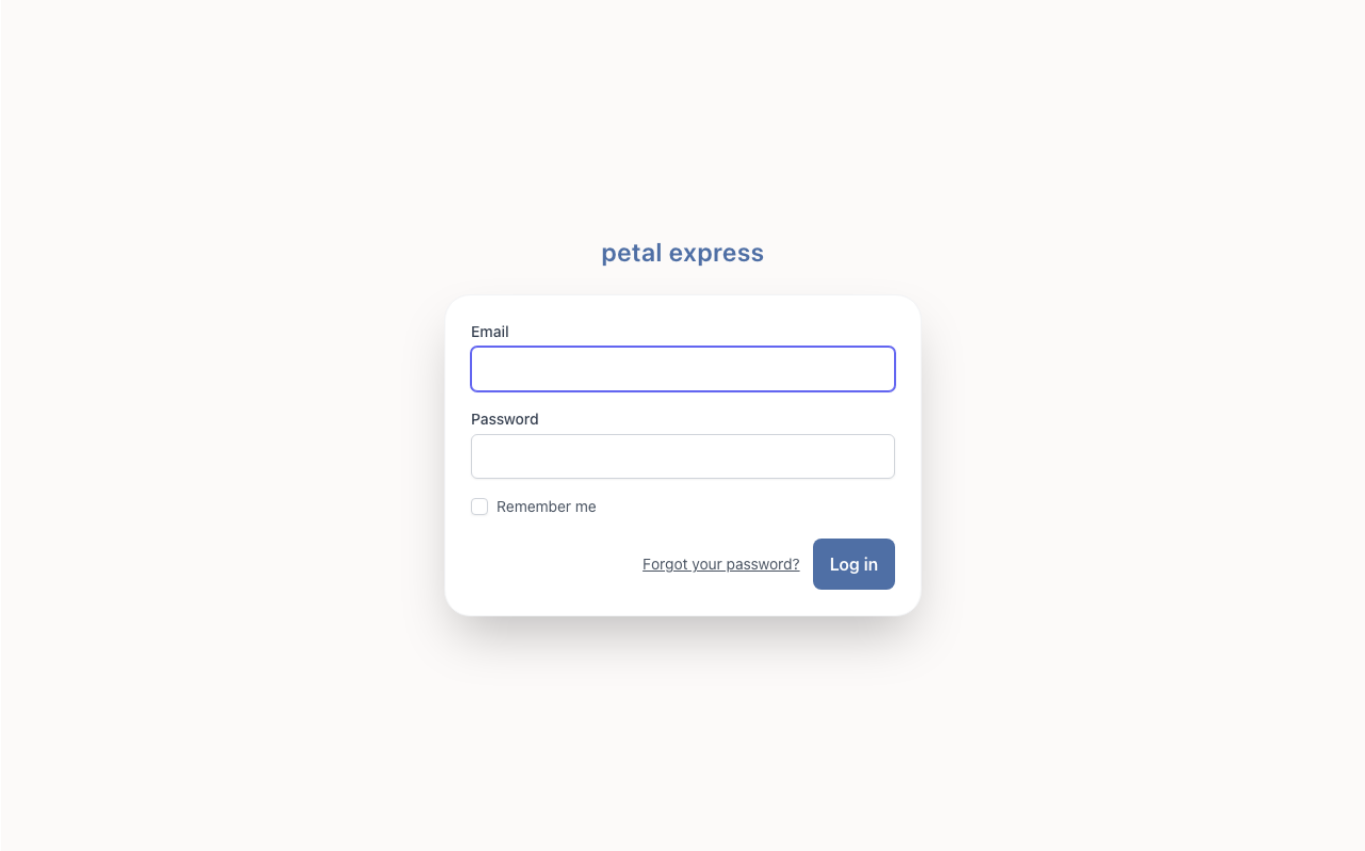

Favorites page while logged in.

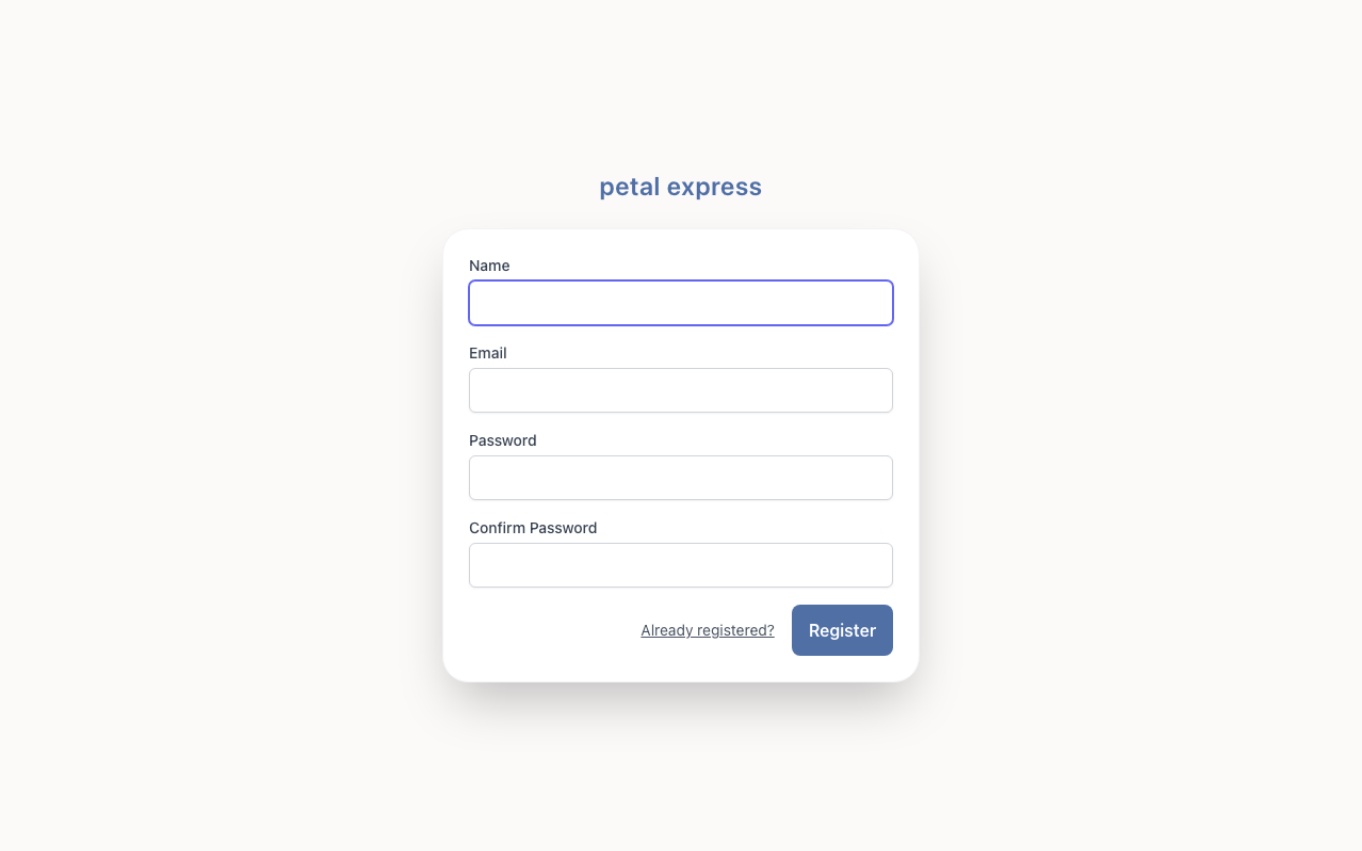

Account page for the signed in user.

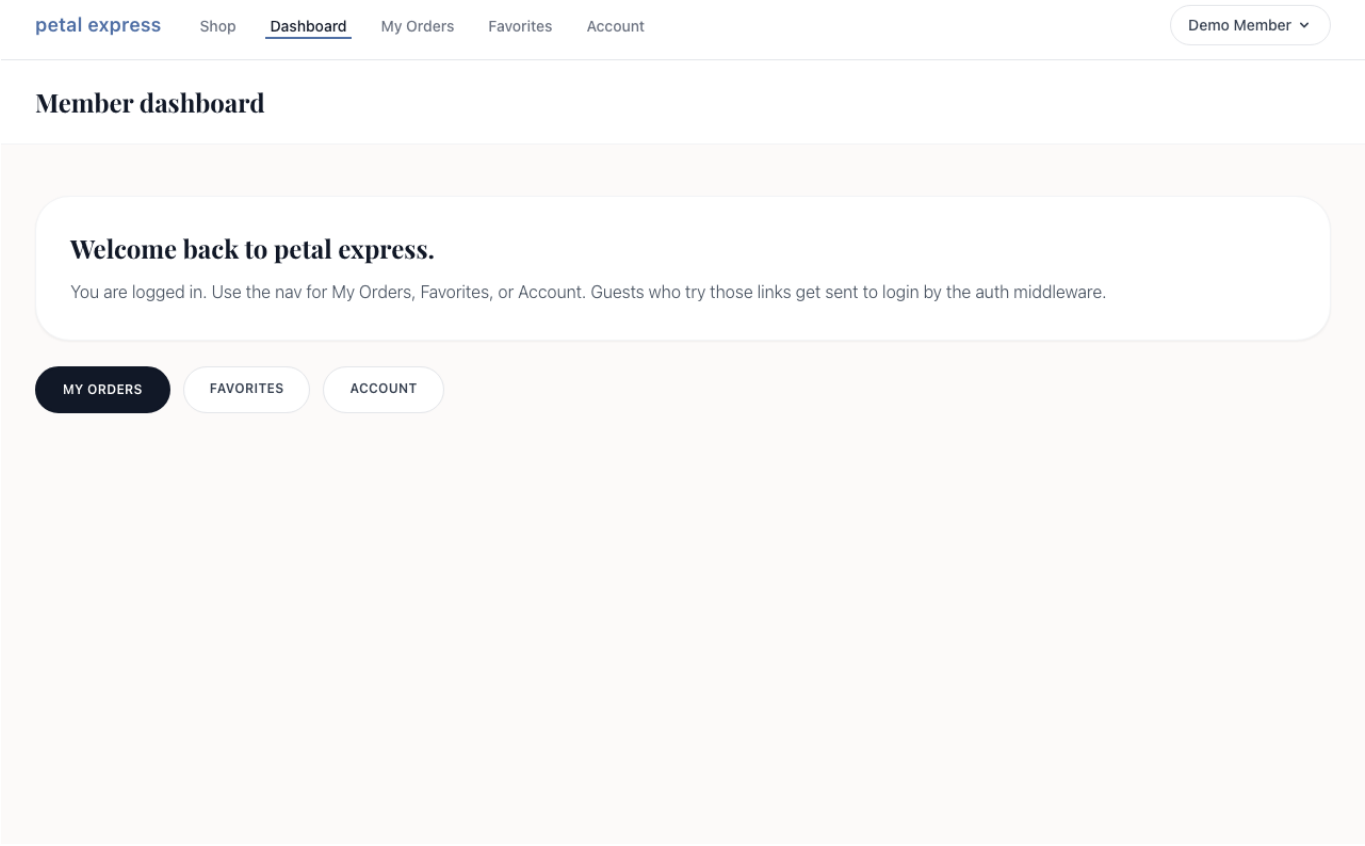

Tried to open Orders without logging in. Auth middleware sent me to the login page.

Breeze register page for new accounts.

Final testing output. Demo member can open protected pages after login.

Final checklist of rubric pieces covered in this Petal Express build.

```
Final checklist

Petal Express Lab Activity 1 — final submit

Done:
- Laravel 11 + Breeze Blade auth (register / login / logout)
- 5 guest pages + /bouquets/{id} route parameter
- 3 member pages behind auth middleware
- Controllers pass data to Blade views
- Breeze layout customized (brand, colors, member nav)
- bouquet-card component with $slot + named badge slot
- Contact form with @csrf
